

Technical Information

Leracid® ECO-TOP cleaner for sanitary facilities

Characteristics:

Acidic cleaner for sanitary facilities – works intensively – removes limescale, dirt and soap residue from tiles, floors and all other objects and surfaces in the bathroom (toilet bowls, washbasins, urinals, bathroom and shower facilities as well as fittings) quickly and powerfully – can be used on all acid-resistant surfaces – a limescale blocker contained in the product reduces the accumulation of new dirt – pleasant, fresh perfume – leaves a streak-free shine.

Application:

Leracid® ECO-TOP cleaner for sanitary facilities is applicable on all acid resistant surfaces. The product can be used as a concentrate for heavy dirt or in dilute form for maintenance cleaning.

Dosage:

Manuel cleaning:	1:10 – use undiluted by heavy product deposits
Maintenance cleaning	20 – 30 ml in 10 litres of water
Spray-/foam devices:	Dilute 1:5 - 1:50
Disc cleaner:	Dilute 0,5 – 3 %

Specifications:

pH of concentrate:	1,5 – 1,7
